

At ELWA, we are working on the urgently needed implementation of decarbonization in industrial companies with our technologies and products manufactured in-house. As one of the world's leading specialists in the electrical heating of fluids in industrial applications, we want to contribute to sustainable rethinking. We are proud of this contribution and every project we implement, and we stand confidently behind our product portfolio. The challenge of converting our customers' thermal processes from fossil fuels to electric heating is what drives us and connects our employees with our sustainable mission.

We would love to have you join our mission of decarbonization.

We are looking for support for our technical team!

Working student in technical development (m/f/d)

The tasks for assisting and collaborating are varied:

- Create detailed technical drawings, test instructions and parts lists for our products
- Participation in the preparation of comprehensive technical specifications for design, production and purchasing to optimize the development processes
- Support in the programming of PLC controls
- Supporting the operational start-up of our systems and creating development documentation in accordance with DIN ISO 9001

You must have the following:

- Currently active technical studies, ideally mechanical engineering with a focus on measurement and control technology as well as production engineering
- Basic knowledge of CAD for technical and/or electrical 3D design (Inventor, EPLAN)
- Basic knowledge of PLC programming (Simatic Step7, CODESYS, logo! Soft)
- Customer-oriented and solution-oriented thinking and ability to work in a team

➔ **Your benefits of working with us are on the next page!**

ELWA

systems for energy

This is what we offer you:
